

DATA COVERAGE

STATS will provide the official Olympic Data Feed (ODF) for the London games. The ODF covers every event in-progress. STATS data coverage includes medal counts, event schedules, in-progress results, event results and historical medal results.

Event Schedules

Complete event schedules will be available prior to the Olympics, including participant details and venue and event information.

Medal Counts

Medal counts are updated at the close of each event. Medal counts can be broken down by event, country and athlete -- providing several different options for your leader boards.

Historical Medal Results

STATS provides a complete medal table by country for the Summer Olympics dating back to the first modern Olympic Games. Medal data includes total medals won by each country and individual athlete as well as Gold, Silver and Bronze breakdown.

In-progress Results

The ODF feed contains in-progress results for individual events and team sport matches.

Individual Heats -- race results will be updated at the end of each individual heat, phase, match, etc...

Team Sports -- in-game score updates will be provided for all team sports

- ▶ STATS has play-by-play and box score level information available for men's basketball and football/soccer.

Events Results

The ODF feed contains complete event results for each sport.

- ▶ Place finished for each participant or team, including non-medal winners
- ▶ Time for timed events
- ▶ Score for judged events
- ▶ Complete scoring information and event statistics for team sports where applicable
